

ANNALS OF ENTOMOLOGY

(An International Journal of Entomology)

The journal "Annals of Entomology", was established in 1983 to promote the research in the field of Entomology. It publishes original research papers, review works and short communications on all fundamental and applied aspects of insects, ticks and mites of agriculture, public health, veterinary, storage, forestry, forensic and biodegradation significance. This bi-annual journal is published in the months of June and December each year.

All publication rights have now been taken over by **CONNECT JOURNALS**. The journal will be published in Print as well as Online versions.
